VAIBHAV RAJ

B.Tech. - Computer Science Engineering

Ph: +91-9708681252

Email: 5860vaibhav@gmail.com

Phagwara, Punjab, India - 144411

PROFESSIONAL SUMMARY

A results-driven Full Stack Developer with strong proficiency in both front-end and back-end technologies, including modern JavaScript frameworks and server-side development. Experienced in building scalable, user-centric web applications with a focus on performance, security, and clean architecture. Passionate about solving real-world problems through efficient coding practices and continuously enhancing technical skills to stay aligned with industry trends. Seeking to contribute to an innovative organization where I can deliver high-quality solutions while growing as a developer.

KEY EXPERTISE

HTML | CSS | JavaScript | Node.js | PHP | Laravel | MongoDB | MySQL | Git & GitHub | React.js | Express.js | Bootstrap | Tailwind CSS | Firebase | WebSockets | WebRTC | Socket.IO | REST API | Git | Figma

EDUCATION

Lovely Professional University — 2023 - 2027

B.Tech. - Computer Science Engineering | Percentage: **76** / **100**

Shershah college sasaram, Sasaram — 2022

12th | BSEB | Percentage: **74** / **100**

DAV Public School, Sasaram — 2020

10th | CBSE | Percentage: **83** / **100**

AWARDS AND SCHOLARSHIPS

- LPUNEST - Scholarship

PROJECTS

Resume Align Bot — 03 Mar, 2026 - 05 Mar, 2026

Team Size: 1

Key Skills:

Node.js | Express | Telegraf | Groq API (Llama 3.3 70B) | Puppeteer | PDF-parse | Mammoth | MongoDB | Winston

Project Link: https://github.com/vaibhavraj26/resume-align-bot

Engineered an AI-powered Telegram bot that analyzes resumes against job descriptions and delivers a match score, skill gap report, and a fully rewritten ATS-optimized resume in PDF and DOCX format.
Architected a 5-step processing pipeline — resume parsing keyword scoring LLM semantic analysis (Llama 3.3 70B via Groq) composite scoring (30% keyword + 70% AI) resume regeneration using Puppeteer and docx; implemented multi-model fallback chain across 4 models to ensure 99% uptime under rate limits.
Eliminated manual resume tailoring for job seekers by automating skill-gap detection and one-click document export; validated with 29 unit tests covering edge cases, achieving production-grade reliability with structured Winston logging.

Nexus Open Chat — 06 Jan, 2026 - 30 Jan, 2026

Team Size: 1

Key Skills:

React | Vite | Tailwind CSS | Framer Motion | Node.js | Socket.IO | WebRTC | Nodemailer | Vercel + Render

Project Link: https://nexusopenchat.vercel.app

Developed a real-time anonymous video and text chat platform that instantly pairs strangers via interest-based matching — no account, no data stored.
Implemented peer-to-peer HD video using WebRTC with STUN-server negotiation; orchestrated signaling, room lifecycle, and user matching via Socket.IO on a Node.js/Express backend; integrated a GitHub Octokit + Nodemailer report API and deployed across a split Vercel + Render infrastructure.
Demonstrates mastery of low-latency networking and stateful WebSocket systems — skills directly transferable to collaboration tools, live-streaming platforms, and fintech dashboards; zero-auth design proves proficiency in privacy-first architecture.

Rural Classroom Connect — 16 Oct, 2025 - 16 Nov, 2025

Team Size: 3

Key Skills:

React | Vite | Tailwind CSS | Radix UI | Node.js | Express | MongoDB | JWT | Vercel + Render | RESTful API | CORS

Project Link: https://rural-classroom-connect.vercel.app

Launched a low-bandwidth remote learning platform tailored for rural colleges, enabling teachers to manage classrooms, assignments, attendance, and announcements — all in one dashboard.
Designed a fully decoupled MERN stack with role-based authentication (JWT middleware), RESTful API controllers for class management and grading workflows, Mongoose schemas for attendance and materials, and a responsive UI built with Radix UI + TailwindCSS; configured CORS-safe cross-origin deployment on Render + Vercel.
Solved a real accessibility gap in underserved education infrastructure — the lightweight architecture targets low-bandwidth environments, reflecting production-level thinking beyond standard CRUD; showcases end-to-end ownership of a multi-user SaaS product.

ACHIEVEMENTS

- NA

SEMINARS / TRAININGS / WORKSHOPS

Logic Building, Programming and Data Structures

02 Jun, 2025 - 28 Jul, 2025

Institute Name: Lovely Professional University

Key Skills: C | CPP | Data Structures | Problem Solving

Mastered core data structures (stacks, queues, linked lists) and problem-solving using C/C++
Solved algorithmic challenges focused on time and space complexity, strengthening problem-solving and logical reasoning skills
Structured modular, optimized code emphasizing performance, readability, and scalability

CO-CURRICULAR ACTIVITIES

- Web-ka-Hackathon – Lovely Professional University, Executed a working prototype within 24 hours during a hackathon, demonstrating rapid problem-solving and execution under pressure

EXTRA CURRICULAR ACTIVITIES

- Volunteered – SABAL (NGO), Assisted in educational and social-impact initiatives by supporting project activities, engaging with students, and contributing to community-focused outcomes.

PERSONAL INTERESTS / HOBBIES

- Content Creation
- Mentoring
- Teaching
- Talking to people
